

EMINOPROTECT

Menopause
FORMULA

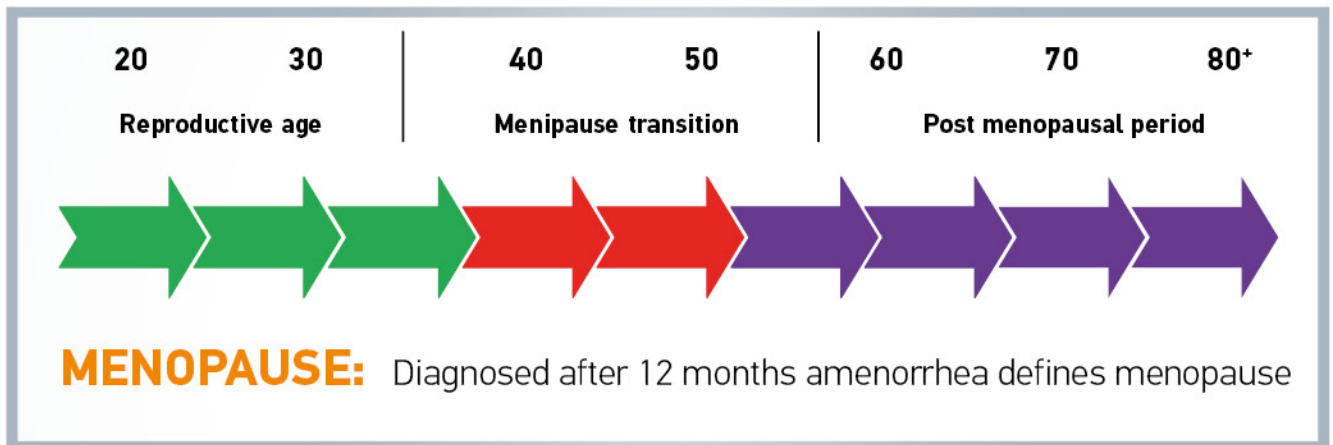

Dietary Supplement

60 tablets

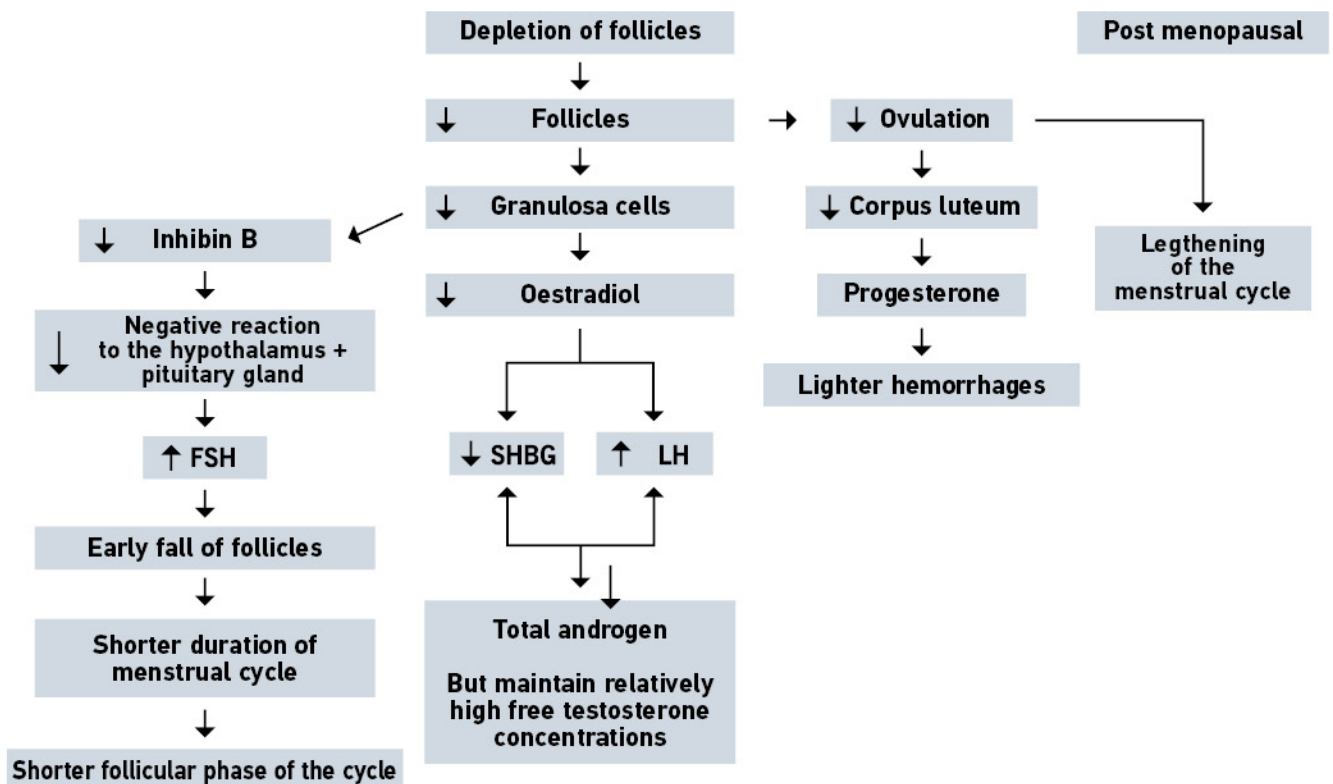

Menopause commences with the absence of menstrual blood for a period of 12 consecutive months. It starts when the production of estrogen and progesterone is significantly lowered. It is a natural process of aging.

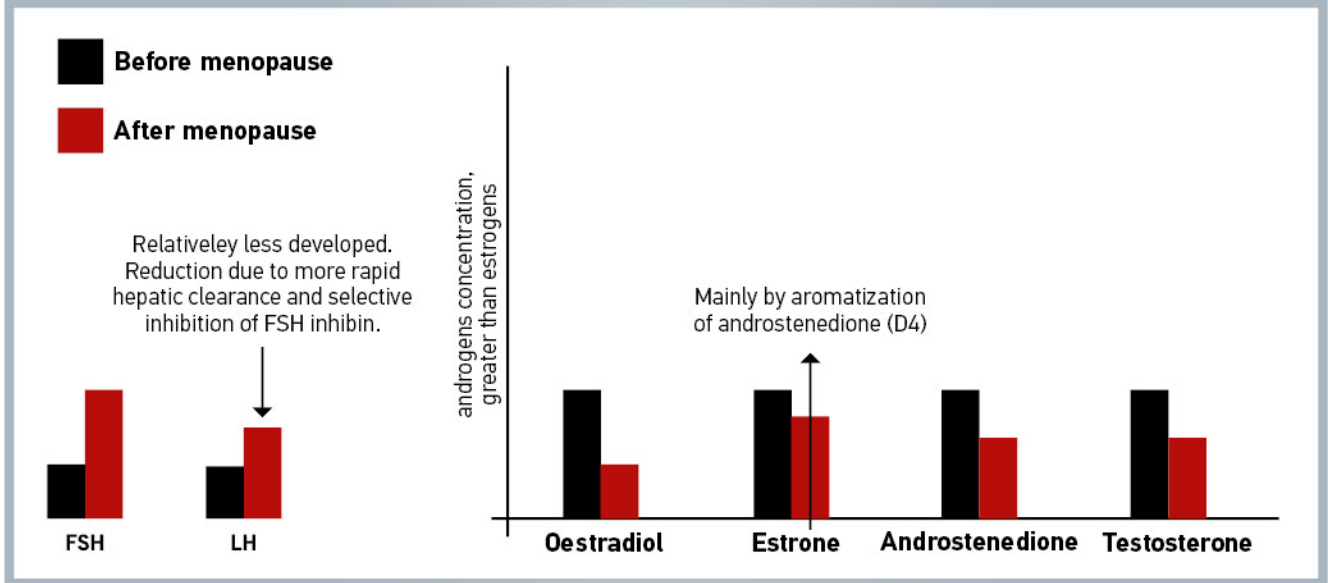

The Menopause Transition

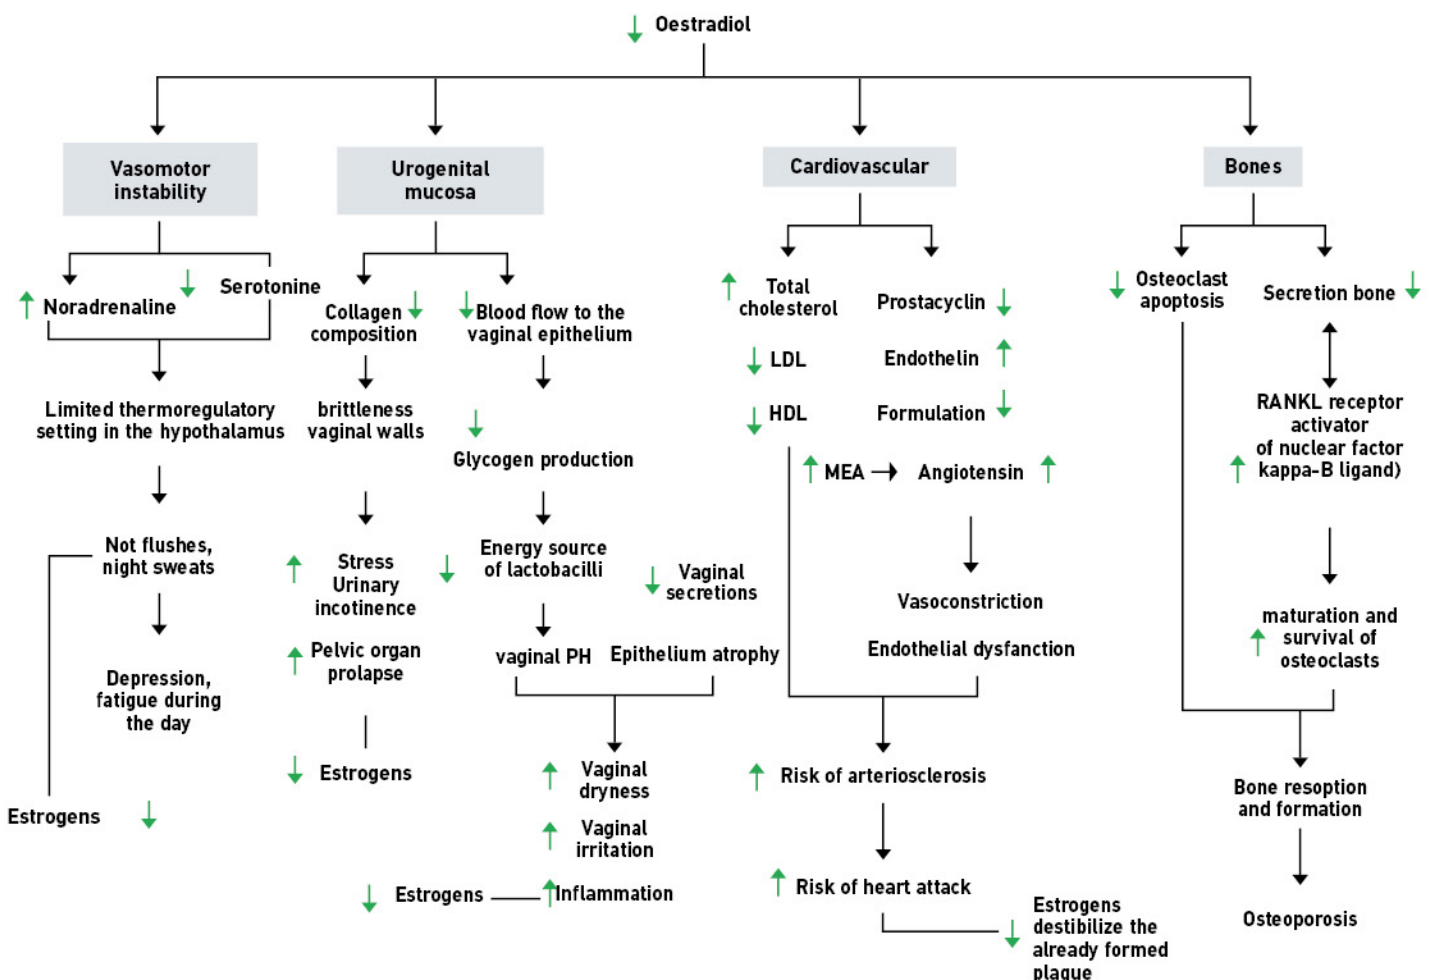

Pre-menopause is the period prior to the transition to menopause. It may begin months or even years before the onset of menopause and ends with menopause. During this stage women experience irregular cycles (changes in the duration or even absence of a cycle) and menopause symptoms. Menopause is caused by depletion of primordial follicles in the ovaries. Women have maximum number of follicles in the 20th week of gestation. The pool of follicles decreases progressively until the age of 50, when this tank of follicles is depleted.

BEFORE AND AFTER MENOPAUSE HORMONAL CONCENTRATIONS

ORGANIC CHANGES DURING MENOPAUSE

Vasomotor symptoms occur to degeneration of temperature control process in the neutral zones of the hypothalamus. A woman around the average age of menopause has outbreaks of sweat (hot flashes) when the body slightly overheats and body chills when the body cools down. The symptoms are worse in the night resulting to bad quality sleep. These symptoms are caused by changes in the levels of estrogen and they gradually subside over time.

REASONS FOR SLEEP PROBLEMS DURING MENOPAUSE

↓ **PROGESTERONE** = Sleep problems

↓ **ESTROGENS** = Sleep problems, secondary to the following conditions

- Hot flashes
- Night sweats
- Mood disorders
- Bloating
- Abdominal cramps
- Nausea
- Headaches
- Itchy skin
- Muscle tension
- Joint aches
- Urinary incontinence

Due to its components **EMINOPROTECT** formula contributes to the natural function of the nervous system throughout menopause as well as to the normal synthesis and metabolism of steroid hormones and Vitamin D, therefore preserving normal bone density.

COMPOSITION IN ACTIVE INGREDIENTS	Per daily dose (1 tab)	% RDA
Don Quai extract (<i>Angelica sinensis</i>), 1% ligustilidi	120 mg	
Glycine max soy 40% isoflavones	80 mg	
Red clover dry extract (<i>Trifolium pratense</i>)	60 mg	
Vitamin B1 (thiamine)	0,7 mg	127,27%
Vitamin B5 (ca-d-pantothenate)	3 mg	50%
Magnesium (as magnesium oxide)	48 mg	12,8%

DOSAGE

- Take 1 tablet once a day.
